EDUCATION

Brigham Young University – Idaho

Bachelor of Science in Software Engineering

Certificates:

Brigham Young University – Idaho Web and Computer Programming Certificate

SKILLS

Core Engineering Skills:

- Python, C#, SwiftUI, JavaScript, HTML, CSS, Angular
- Object-oriented design, debugging, and data-driven application development
- SQL databases and RESTful API design

AI & Emerging Technologies

- Build agent-based RAG pipelines using LangChain, ChromaDB, and OpenAI embeddings
- Anthropic Claude API integration including multi-step tool use and agentic workflows
- Containerized applications with Docker and Docker Compose

WORK EXPERIENCE

Teacher's Assistant – Software & Programming Courses

April 2025 – Current

- Assist students with programming logic, debugging, and problem-solving techniques across 36 programming challenges.
- Provide one-on-one technical mentoring in person and remotely.
- Collaborate with faculty on grading and refining technical assignments.

Brigham Young University - Idaho – Faculty Technology Center

Team Lead | March 2024 – February 2025

- Supported enterprise-scale educational systems serving thousands of users.
- Coordinated technical teams and contributed to hiring and training processes.
- Delivered solutions aligned with customer needs and organizational goals.
- Collaborated with stakeholders to troubleshoot software defects and improve system workflows.

Assistant | April 2022 – March 2024

- Supported faculty with software troubleshooting across multiple platforms and operating systems.
- Assisted in deploying and maintaining technology solutions used in live classroom environments.
- Participated in AI expos and technology initiatives, gaining exposure to emerging development tools.
- Designed and deployed 85-120 web based instructional content for over 45 professors, aligning those materials with university expectations.

PERSONAL PROJECTS

Document Assistant (Python): Agentic RAG system utilizing summary-based embeddings for document retrieval
